Dashboard

My Apps

This is the area where you manage all your apps. Here you can edit an app, deactivate it, add advanced app features like monetization, analytics, push notifications and more. Managing users, email templates, app hosting and plan upgrades are also done here. You can also convert your app into a website.

Create Apps

You can create an app with three simple steps. Choose a category, build the app and then publish it. You can create mobile apps for iOS, Android, Windows, Blackberry and Kindle platforms, without the use of any programming skills. Simply drag & drop app pages. Choose theme customization to give your personal touch to the designing of the app.

Update your account settings here, personal information, Id, password and details to subscribing to can be all done here.

My Account

Game freaks can now create games with characters of their choice. The process comprises 3 simple steps. All you need to do is select the game type, enter the game info, update the game settings –and voila! Your game is ready. You can create mobile games for both iOS & Android platforms.

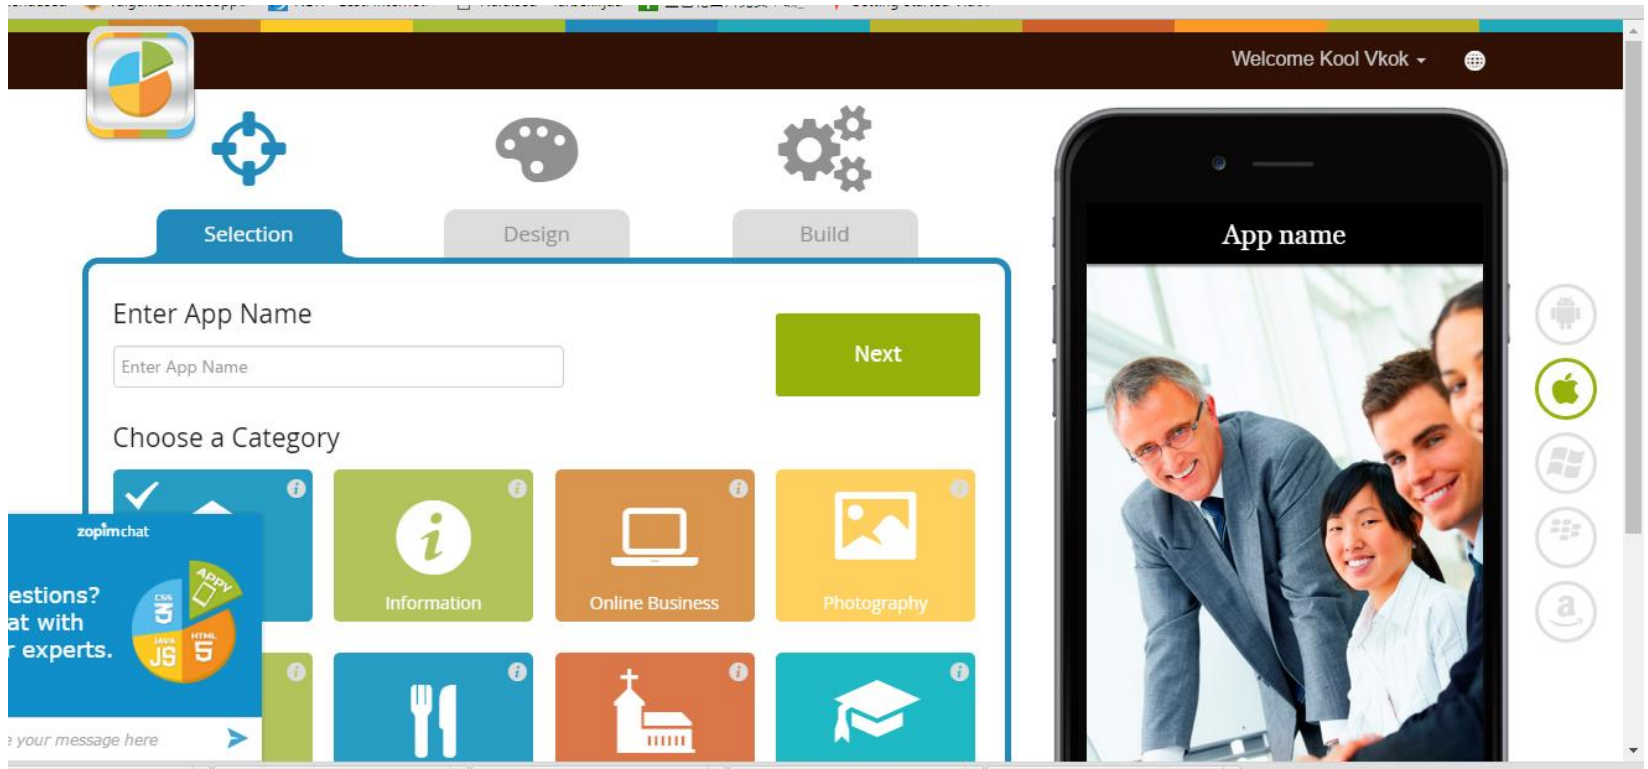

Create Games
